INTRODUCTION

The National Park Service (NPS) Socio-Economic Studies Division (previously Statistical Office) acknowledges the conscientious efforts of the field staff of the many areas of the National Park System. Without the effort of the park staff to count, record, and report the data summarized here, a statistical report of this quality would not be possible. Public use data is collected and analyzed monthly. A program of auditing park counting procedures is conducted to ensure consistency and accuracy of data.

The gathering and publication of these statistics is in accordance with Public Law 88-29, "An Act to Promote the Coordination and Development of Effective Programs Relating to Outdoor Recreation" and related legislation. Definitions of terms in use here are given at the end of this report. The definitions are those initially outlined by "A Uniform Method for Measuring and Reporting Recreation Use on the Public Lands and Waters of the United States", unpublished guideline of the Recreation Advisory Council Study Committee Number Two, April 1965.

Footnotes are provided at the end of this report. The footnotes describe conditions at parks which may require important adjustments for certain applications of these data.

National Park Service professionals are rededicated to their fundamental mission as archivists of the Nation's history, providers of educational and leisure time opportunities, and protectors of our resources for future generations.

Timely, reliable, and useful information is fundamental to effective management and planning of the National Park System. This annual report is a general summary of visitation records for the year. Comments or requests for additional statistical information should be addressed to:
